Office Action Summary	Application No. 10/526,591	Applicant(s) HIRSCH, OLAF	
	Examiner Temica M. Beamer	Art Unit 2617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1 recites the limitation "baseband portion" and "radio portion" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 11, 14-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Oshima, U.S. Patent No. 6,590,888.

Regarding claims 1-3, 11 and 14-25, Oshima discloses performing signaling between a first portion (baseband) of a communications apparatus and a second portion (radio) of the communications apparatus (figure 2), comprising: encoding data units of a

given number of bits to form codes, each code being a data unit of a number of bits greater than the given number of bits; defining multiple different types of information exchanges and assigning a different code to each type of information exchange; and for a given information exchange: forming a message frame in accordance with the information exchange type selected, the message including a code identifying the information exchange type; and transmitting the message frame between the baseband portion and the radio portion (col. 6, line 22-col. 7, line 16).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oshima in view admitted prior art.

Regarding claims 12 and 13, Oshima discloses the method of claim 11 as described above. Oshima, however, fails to disclose wherein the codes are 8b/10b codes.

However, as admitted by the applicant on page 1, lines 4-8 of the specification, such codes are well known in the art.

At the time of invention, it would have obvious to a person of ordinary skill in the art to modify Oshima with the applicants admitted prior art as such a modification would have been a design choice based desires system performance.

Allowable Subject Matter

8. Claims 4-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Saito, U.S. Patent No. 6,987,767, discloses a multiplexer, multimedia communication apparatus and time stamp generation method.
